23. A healthy planet and sustainable economic growth are mutually beneficial, and therefore, we are pursuing global efforts towards a sustainable and resilient future that creates jobs for our citizens. We firmly support the broad participation and leadership of young people, girls and women in promoting sustainable development. We collectively affirm our strong determination to achieve a clean environment, clean air, clean water and healthy soil. We commit to ongoing action to strengthen our collective energy security and demonstrate leadership in ensuring that our energy systems continue to drive sustainable economic growth. We recognise that each country may chart its own path to achieving a low-emission future. We look forward to adopting a common set of guidelines at UNFCCC COP 24.

24. Canada, France, Germany, Italy, Japan, the United Kingdom and the European Union reaffirm their strong commitment to implement the Paris Agreement, through ambitious climate action; in particular through reducing emissions while stimulating innovation, enhancing adaptive capacity, strengthening and financing resilience and reducing vulnerability; as well as ensuring a just transition, including increasing efforts to mobilize climate finance from a wide variety of sources. We discussed the key role of energy transitions through the development of market based clean energy technologies and the importance of **carbon pricing**, technology collaboration and innovation to continue advancing economic growth and protect the environment as part of sustainable, resilient **and low-carbon** energy systems; **as well as financing adaptive capacity**. We reaffirm the commitment that we have made to our citizens to reduce air and water pollution **and our greenhouse gas emissions to reach a global carbon-neutral economy over the course of the second half of the century**. We welcome the adoption by the UN General Assembly of a resolution titled Towards a Global Pact for the Environment and look forward to the presentation of a report by the Secretary General in the next General Assembly.

26. The United States believes sustainable economic growth and development depends on

universal access to affordable and reliable energy resources. It commits to ongoing action to strengthen the world’s collective energy security, including through policies that facilitates open, diverse, transparent, liquid and secure global markets for all energy sources. The United States will continue to promote energy security and economic growth in a manner that improves the health of the world’s oceans and environment, while increasing public-private investments in energy infrastructure and technology that advances the ability of countries to produce, transport, and use all available energy sources based on each country’s national circumstances. The United States will endeavour to work closely with other countries to help them access and use fossil fuels more cleanly and efficiently and help deploy renewable and other clean energy sources, given the importance of energy access and security in their Nationally Determined Contributions. The United States believes in the key role of energy transitions through the development of market-based clean energy technologies and the importance of technology collaboration and innovation to continue advancing economic growth and protect the environment as part of sustainable, resilient, and clean energy systems. The United States reiterates its commitment to advancing sustainable economic growth, and underscores the importance of continued action to reduce air and water pollution.
