??

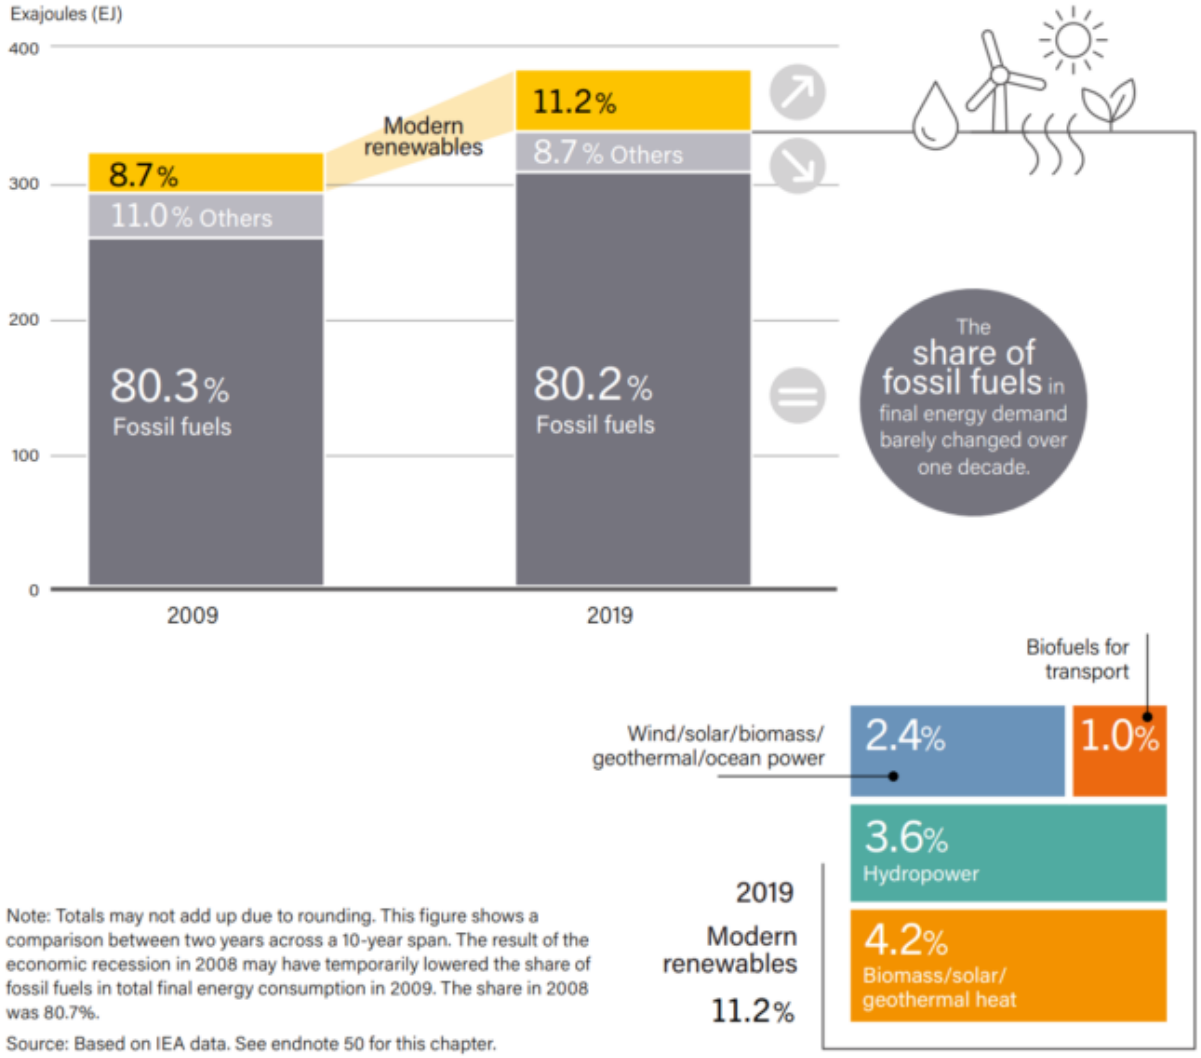
FIGURE 2.
Estimated Renewable Share of Total Final Energy Consumption, 2009 and 2019



Note: Totals may not add up due to rounding. This figure shows a comparison between two years across a 10-year span. The result of the economic recession in 2008 may have temporarily lowered the share of fossil fuels in total final energy consumption in 2009. The share in 2008 was 80.7%.

Source: Based on IEA data. See endnote 50 for this chapter.
